

Internet Safety Day

'Safer Internet Day 2021' was nationally celebrated on Tuesday 9th February 2021 this year. It is an annual celebration that aims to raise awareness of the concerns amongst young children. These are from cyberbullying to social networking and digital identities. We are all very aware that our pupils regularly use the internet in school and at home. All the staff at PACE think it is extremely important to consistently emphasise the importance of staying safe whilst being online.

Each class took part in the BBC Teach Live Lesson on E-safety. This lesson helped the children understand what it means to stay safe, sensitive and smart online. The children learned how they can stay safe and responsible. The children were given the opportunity to give their views on how they think they could stay safe, be careful and what they should do if they felt unsafe or unsure about anything they see. All the children gave some great ideas and all agree how important it is to stay safe online.

Safer Internet Day - Live Lesson

During the online safety live lesson, the children took part in an activity and discussion about what they use the internet for.

This activity sheet is designed to be used alongside the Safer Internet Day Live Lesson, available on 9th February 2021 on BBC Teach and CBBC.
Can you think of all the things you use the internet for? Tick off the activities below, chat about it to the person next to you or write down your own.

Some of our children created their own posters to help explain to others how they can stay safe online.

What else do you use the internet for?
