

The Chicks

Living Eggs Ready to Hatch is a unique 10-day programme that provides schools with all you need to hatch chicks whilst in school. The Living Eggs programme is an amazing way to provide our pupils with the opportunity to watch, bond and nurture these living things from when they hatch. The children were able to see some of the eggs hatch, hold the chicks and make sure they had food and water. This was a great experience for all of our children to see and look after one of our PACE pets.

Some of our children learned the life cycle of a chick and did some independent writing about what they had learned about the chicks in class.

Having the chicks was a wonderful experience for the children as they were able to learn how to look after the chicks before and after they hatch. It was a great achievement to look after eight chicks this year.
